EXTREME CHLORINE RESISTANCE

elite® exclusive formulated surface protects the membrane from discoloration by chemical substances such as chlorine. It solves the most common bleaching problem caused by chlorine exposure over time.

COMPLETE WATERLINE PROTECTION

With a regular surface, such as tile, gunite, fiberglass or a weaker membrane, you are required to clean the stains very quickly for best results. With elite®, you maintain a clean pool with less effort.

EXTREME UV RESISTANCE

Only pure virgin material is used in the manufacturing process in order to deliver a superior membrane. elite® is the preferred pool surface in areas with extreme UV radiations, such as Australia or the Caribbean.

EASY TO CLEAN

The surface of elite® prevents the penetration of sun creams, cosmetics and other chemicals that cause stains, especially on the waterline under the effect of the sun.

You don't need to use expensive and harmful chemicals to maintain your pool nice and beautiful.

ALGAE RESISTANCE

Organic residues and humidity can allow bacteria to grow on weaker membrane. elite® surface prevents unsightly and unhealthy bacteria from penetrating it and growing.

THE BEST CHOICE

elite® is the first phthalate free membrane in the market. The chemical phthalate, widely used in plastics for half a century, is replaced. elite® also fulfills the standards EN 71-3 about the plastics used in the toy industry to protect the children from hazardous elements.

reinforced mesh with unique structure

elite® is the best anti stain resistant pool surface on the market. It is extremely strong against chemicals, like chlorine and offers a complete waterline protection. The internal geometrical mesh guarantees a perfect dimensional stability during and after the installation in order to achieve an excellent result. This is the best choice because **elite**® is free of hazardous elements.

elite® reinforced membranes are engineered and manufactured in a state-of-the-art facility in Coswig (Dresden), Germany. »Made in Germany« by ELBTAL PLASTICS means superior quality.
